The Universal Force Volume 1 - Derived From A More Perfect Union of the Axiomatic and Empirical Scientific Methods This is the first volume of a set. The purpose of the set of books is to lead a reformation movement in modern science to perfect the union of the ancient Greek axiomatic method of Euclid with the empirical scientific method of Isaac Newton. The first volume derives an improved version of the electrodynamic force by using a complete set of the empirical laws of electrodynamics as the postulates for the axiomatic method. In the first volume is shown that the effects of Special Relativity are due to electrical feedback effects on finite size charge structures. Also the book shows that quantum effects such as the photoelectric effect and black body radiation are due to resonant effects in finite-size charge structures consisting of closed charge loops. The improved electrodynamic force law derived in the book contains acceleration a terms for radiation and dadt terms for radiation reaction. From this improved electrodynamic force law is derived improved versions of the...
