From Parity Violation to Hadronic Structure and More: Proceedings of the 3rd International Workshop Held at Milos, Greece, May 16-20, 2006

Springer-Verlag Berlin and Heidelberg GmbH & Co. K. Paperback. Book Condition: New. Paperback. 208 pages. Dimensions: 11.0in. x 8.2in. x 0.5in. Almost 50 years after the proposal of Lee and Young in 1956 to test the hypothesis of parity violation in weak interactions and the subsequent experimental verification of parity violation by C. S. Wu, parity violation has today become a useful property of weak interactions. This is due to the fact that the focus nowadays has changed: parity violation in weak interactions is no more a topic of investigation but is used as a tool in many different fields ranging from nuclear physics to the search for the hidden extra dimensions requested by string theory. For our first workshop which took place June 5-8, 2002, at the Institut für Kernphysik of the Johannes Gutenberg-Universität Mainz, we concentrated on the investigation of the strangeness contribution in the nucleon. This book contains the refereed and selected papers of the second workshop From Parity Violation to Hadron Structure and more (Part II), which took place June 8-11, in the Laboratoire de Physique Subatomique et de Cosmologie, in Grenoble. These papers appear in EPJAdirect, the electronic-only part of EPJA, and they...
