Although numerous books and articles have recently talked about the gut instincts as valuable in giving us useful hunches in the decision-making process, Whats Behind Your Belly Button goes much further and explains how gut feelings not only have a psychological intelligence of their own, but are also understandably rational in their functioning. The authors explore how gut feelings are like a gas gauge in our guts indicating through an emotional feeling of emptiness or fullness how well the two instinctive human needs for acceptance (attention from others) and of control of ones own responses (freedom) in our lives are being met and how our behavior attempts to keep these two instinctive needs in balance at all times. They explore how these two instinctive needs motivate nearly all our behaviors all through our lives and that the feeling memory of how well these needs are met from moment-to-moment may be accessed through somatic awareness of our gut feelings of empty and full by using the Somatic Reflection Process the authors have developed. In 1998, neurological research at Columbia University published the work of Dr. Michael Gershon that identified the enteric nervous system as a center of feeling-intelligence in the gut, which he called the Second Brain. The authors carefully examined this material and accepted the research findings as pointing to the same universal feeling intelligence they experienced in counseling with hundreds of people. Utilizing the research of Dr. Gershon, the work of Dr. Lise Eliot who charts the development of children from conception through the first five years of life, recent research of their own in the Psychology Department at Sonoma State University, and their vast clinical experience, the authors have...
