

## Theoretical Models of Chemical Bonding

By Maksic, Zvonimir B. / Alagona, G.

Book Condition: New. Publisher/Verlag: Springer, Berlin | Part 3: Molecular Spectroscopy, Electronic Structure and Intramolecular Interactions | The renowned theoretical physicist Victor F. Weisskopf rightly pointed out that a real understanding of natural phenomena implies a clear distinction between the essential and the peripheral. Only when we reach such an understanding - that is to say when we are able to separate the relevant from the irrelevant, will the phenomena no longer appear complex, but intellectually transparent. This statement, which is generally valid, reflects the very essence of modelling in the quantum theory of matter, on the molecular level in particular. Indeed, without theoretical models one would be swamped by too many details embodied in intricate accurate molecular wavefunctions. Further, physically justified simplifications enable studies of the otherwise intractable systems and/or phenomena. Finally, a lack of appropriate models would leave myriads of raw experimental data totally unrelated and incomprehensible. The present series of books dwells on the most important models of chemical bonding and on the variety of its manifestations. In this volume the electronic structure and properties of molecules are considered in depth. Particular attention is focused on the nature of intramolecular interactions which in turn are revealed by various types...

### Reviews

*A whole new electronic book with a new point of view. It can be full of knowledge and wisdom. It's been written in an exceedingly simple way which is only following. I finished reading through this pdf in which really modified me, modify the way in my opinion.*

-- **Arianna Nikolaus**

*This ebook is wonderful. I have got to go through and so I am certain that I am going to likely to read through once again again later on. You will like the way the article writer compose this ebook.*
