By Paint Manufacturers Section

Rarebooksclub.com, United States, 2013. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book ***** Print on Demand *****.This historic book may have numerous typos and missing text. Purchasers can usually download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1911 edition. Excerpt: .hospitals and other public buildings where specific amounts of light are desired. In the same paper, the subject of factory illumination was discussed and the savings in coal or electricity resulting from proper painting were pointed out. Since the interior of factories are almost invariably painted white, further data has apparently become necessary for the guidance of factory engineers in order that intelligent selections of wall and ceiling colors may be made. Accordingly, more extended tests have just been made in which were included a number of commercial paints obtainable upon the market that have been widely used for increasing the light in factories. The test pieces selected were of sheet tin, approximately six inches square. They were first primed with a flat white lithopone paint and then given three coats of the various paints made up for test, allowing two days for drying...
